

Mohawk Valley Water Authority Capital Improvement Program Cavanaugh Road 24" By-Pass Water Main

Preparation to mount Tapping Sleeve & Valve on existing 4" main outlet from Cavanaugh Road Water Tank.

Setting new Magnetic Meter Assembly in Concrete Chamber.

Excavation for connection to existing 24" water main. 100 ± year old main was found in very good condition.

Connections installed with two (2) new 24" isolation valves. Concrete thrust blocks poured to include stabilize pipe against pressure induced movement.
